Our Community

The ultimate notion in which Axis Interior has been founded on, is to provide a community service that assists the local market by providing a professional environment where students and graduates can be trained to be qualified practitioners of the field. We focus on the youth as we believe that they are the prospect of a better life and the levitators of the nation's trajectory.

At Axis Interior, We offer summer internship opportunities for students. Furthermore we have created a co-op training program where graduates can apply to join us as full-time on job trainees. The program provides an intensive professional work experience to make sure that our trainees are ready for the profession.

Our Scope of Services

Interior Design

Axis Interior understands that interior spaces can push a business forward. Thus we make sure that our work translates high performance, comfort, flexibility and durability, while meeting our clients' brands, budgets, business objectives and values. Our work specialty covers various types of projects offering an extensive range of services including:

- Public Buildings
- Restaurants & Cafes
- Retail
- Offices
- Healthcare
- Hospitality
- Education

Architecture

It is important that a project identity be kept in unification within all aspects, Including architecture. At Axis Interior, we provide architectural services powered by **Sabbagh Engineering Consultants & Associates (SECA)**

www.sabbagh.sa

Technical Support

A good project requires not only a proper design but also well engineered studies and solutions. Axis Interior professional engineering and design team work hand in hand to provide distinctive projects with high performance and reduced costs in all of the project phases. We offer a wide range of technical support services including:

- Fit-out / Construction Management
- Cost Analysis
- Concept Evaluation
- Program Development
- Engineering and Technical Supervision
- Value Engineering
- Risk Analysis

Offices

Employees are the most valuable asset in any organization. They cost around 92% of its total expenses and spend significant amount of time in their offices to accomplish its objectives. Based on this, it has become crucial for organizations to provide an appealing and comfortable workplace environment for its employees.

To help organizations overcome this challenge, Axis provides a full office turnkey service that helps transform the workplace into an exciting and inspiring environment. Our designs are developed to support the creativity and productivity of employees.

At Axis, we enjoy every moment of creativity we spend in creating total office solutions that are motivating, functional and communicating our clients' story.

Healthcare

It is fact that medical environment has excessive influence on patients. The psychological status plays a great role in the treatment process. Therefore, Axis Interior believes that working on any medical site is a fundamental matter since it is related to patients' health. It needs professionals who could create pleasing surroundings that spread peace and positive vibe through using influential colors, optimistic words, noise-reducing materials, natural light and energy-saving options.

Axis Interior has a vast communication platform with key players in the healthcare arena. We successfully accomplished many turnkey projects in big government and private hospitals around the country.

We are honored to continue contributing to our society through our work aiming to enhance the health environment and patients' status.

Education

When it comes to educational spaces, it is important to keep in mind the direct relation between the space environment and atmosphere to users. Innovative designs, proper lighting and thermal comfort are highly appreciated in classrooms as they enhance the efficiency and concentration level in students, staff and faculty. We always try to balance our designs so that they can be strongly functional and efficient yet highly aesthetic and creative for the students to have an exceptional learning experience
